Updating your Fujitsu P2110 LifeBook User’s Guide

Thank you for purchasing a Fujitsu LifeBook notebook. Fujitsu is committed to bringing you the best computing experience with your new system.

Please note the following:

In the User’s Guide that accompanied your system, there is an inaccurate statement on page 48 of Chapter 5, “Using the Integrated Wireless LAN”. The first sentence states: “Thank you for purchasing a Fujitsu LifeBook with an Integrated Wireless LAN.” This is inaccurate, because Fujitsu P2110 LifeBooks are available either with or without a wireless LAN device. The wireless LAN is an optional feature which must be ordered by the end-user prior to system purchase. (As noted on page 6 of the manual: “the wireless LAN is an option.”)

An easy way to determine whether your system has a factory-installed wireless LAN device is by checking the label on the back of the system. An example of the label is shown below.

If the label has an exclamation point in a circle following the “CE” label, then your system has a factory-installed wireless LAN device installed. If the exclamation point in a circle symbol is not present, then your system does not have a factory-installed wireless LAN device installed.

We sincerely regret any misunderstanding that may have resulted from this statement.

Thank you for your continued support. We appreciate your business!
