Fujitsu PCs use genuine Windows® operating systems

<http://www.microsoft.com/piracy/howtotell>

\* Model P-2040 was the award recipient 1) Weighs 2.8 lbs. with weight saver. 2) Battery life estimates reflect the results of Ziff-Davis Business Winstone 2001 BatteryMark 1.0 as performed upon systems with maximum battery life settings enabled. Actual battery life will vary based on screen brightness, applications used, features selected, power management settings, battery conditioning, and other customer preferences. CD, DVD, CD-RW, LAN, Wireless LAN, or hard drive usage may also have an impact on battery life. Requires optional high-capacity battery and optional second bay battery for optimal battery life. 3) 16MB of the total system memory is used by Crusoe processor's Code Morphing Software (CMS) 4) Accessible capacity may be less due to formatting, applications, and backup utilities. For maximum user convenience and confidence, 1.5GB of the drive is partitioned and the original factory image is stored there. PowerQuest® Drive Image® Special Edition, a system recovery utility, can be used to restore the computer to its original state at any time. 5) The internal modems on all Fujitsu notebooks from Fujitsu PC Corporation are only qualified for use with telephone systems in selected countries, including the United States and Canada. For a list of certified countries, please check [www.fujitsupc.com/modems](http://www.fujitsupc.com/modems) 6) Actual speeds over U.S. telephone lines vary, and are less than 56Kbps due to the current FCC regulations and line conditions. 7) Service and warranty turnaround time may vary by country and product. International warranty valid only for products purchased in North, Central, and South America.
